on Grandville & Versailles Crystal

It's Magic... Durable outside – Elastic inside

Experience one of the five new innovative Crystal Glass ranges from Oneida, which combine the unique characteristics of magnesium smoothness with the glass making expertise of Walther Glass, who have a history of six generations in glass engineering.

The range offers high quality crystal glass that meets the needs of discerning food service operators: durable, elegant, beautiful yet practical.

Discover the brilliance and shine of these crystal clear glasses, which are highly resistant to scratches due to their unparalleled hardness and the exclusive magnesium-based crystalline body.

When it comes to compatibility with commercial dishwashers and back-of-house handling, these glasses are engineered to perform. The magnesium compounds mean the elasticity modules are increased and the tensile and bending strength of the glass is maximized.

Our introductory offer on the Grandville and Versailles ranges is the ideal opportunity for you to trial these amazing ranges of crystal glassware and see the results in your own establishment - please contact your local Oneida representative immediately for a quote or call us on Tel: 020 8208 7385 for your local distributor details.
